SMARTSTART™ BT

Affordable way to SmartStart your car

Use your Smartphone as the remote

Add it to any installed Python System

Lock

Unlock

Truck Release

Remote Start

Here's how it works: As the user walks toward their car, the Bluetooth in the phone connects with SmartStartBT. When the customer opens the app, it detects the Bluetooth connection and automatically switches to send commands via BT. The user taps their command, which is performed instantly.

- SmartStartBT is the lowest-cost option to get SmartStart in a car
- SmartStartBT uses Bluetooth to connect your Smartphone and car
- SmartStartBT is the ideal back-up to any SmartStart system if there's no cellular coverage
- SmartStartBT will connect via Bluetooth when the user is in range
- SmartStartBT can also be added to virtually any installed Python security or remote start system adding Smartphone control to the installed system
- SmartStartBT can be installed as a stand-alone keyless entry system, offering lock, unlock and trunk pop (Compatibility is vehicle-specific, some cars will require an interface or may not be compatible at all)

SEND COMMANDS TO YOUR VEHICLE FROM YOUR BLUETOOTH DEVICE

SMARTSTART BT

Key Features:

- Lock/unlock vehicle doors
- Arm/disarm vehicle security
- 2-way command confirmation
- Vehicle name customizing
- Passcode protection app
- Trunk pop

Additional Features:

- Additional features supported when connected to remote starter or security and remote start systems (start vehicle, activate panic alarm, auxiliary channels)
- Compatible with all '10-'13 Python Starter models

PRICE	RETAIL
# DSM50-BT	SmartStart Bluetooth

WHAT'S NEW

PYTHON XPRESSSTART|ONE

INTRODUCING XPRESSSTART|ONE

The true convergence of security, remote start and interface is finally here.

The new XPRESSSTART|ONE merges digital and analog technologies into an innovative and universal digital platform.
Dream, design and build any system for any vehicle your customers drive into your bay.
As you enjoy unprecedented flexibility, XPRESSSTART|ONE will change and grow your business.

Databus Interface

Digital Platform.
No longer a separate stand alone module, DBALL technology is built right in!

Security & Remote Start System

Analog Platform
Fully featured systems with fewer wires, fewer parts, and faster installation times!

XPRESSSTART|ONE
Universal Digital Platform

The best of both worlds, brought together in this sleek and elegant new system

XPRESSKIT
Additional Info @ www.xpresskit.com

XPRESSSTART|ONE

Is your simple and streamline solution that features:

RF Compatibility

XPRESSSTART|ONE includes our most popular 1-way and 2-way solutions

SMARTSTART Compatibility

Plug in any SMARTSTART module to give your consumer control from their Smartphone

Minimal Inventory

XPRESSSTART|ONE can be used for all remote start or hybrid security/remote start system

Python SMARTSTART Compatible

The complete line is compatible with iPhone, Blackberry, Windows and Android Smartphones
XPRESSSTART solutions lead the industry in vehicle compatibility

Fall 2013 - T-Harness available for XpressStart One. Contact our sales associate for pricing and availability.

PYTHON XPRESSSTART

WHAT'S NEW

XPRESS**START** is the new digital technology, which includes the XPRESS**KIT** DBALL, that saves huge amounts of installation time per vehicle. XPRESS**START**'s configurable hardware and easy three-step installation process create such an efficient solution, you will get more cars through the bay than ever before

XPRESS**START** is the new digital solution that significantly saves installation time and provides a more reliable connection to the vehicle.

Use the same XPRESS**START** system hardware for both **RSR** and **RXT** solutions

Saving time is all about keeping it simple. XPRESS**START** kits remove the guess work when configuring your remote start systems, while still offering several key options for a wide range of vehicles

RSR This basically means that the vehicle's computer has the ability to start the car and do all the convenience functions (locks, alarm, truck, etc) and just needs to be controlled

The control is done by a **DBALL Flash for RSR**

- Many features can be programmed at time of flashing
- Run time
- Convenience controls

Just by installing a **DBALL** you will have a remote start by pressing lock 3 times on the factory remote.

Some vehicles have a **T-HARNESS** that can be added to make the install even easier.

3x

Factory Remote

At this point you have 2 options to add range for the customer

RXT This is used when the vehicle already has a factory remote start

Flash the **DBALL** for **RXT**

2 options to add range for the customer

OPTION 1
Add a **PYTHON** SMART**START** Package

DSSC200
DSSC250-**GPS version**

OR
Only 1 of these options can be added

These part numbers contain all the necessary parts, including the **DBALL**.
Only the **T-HARNESS** is extra.

OPTION 2
Add an antenna and remote

#4108 #4218

#4208 #4708

Some vehicles have a **T-Harness** that can be added to make the install even easier. Refer to XPRESS**KIT** website for proper harness. Gm OBD II harness has no guide and must be matched up physically.
T-Harness available for Chrysler, Toyota, General Motors, Push-to-Start Nissan, Infiniti and in Fall 2013 for Ford models.
See page 13 for complete listing of T-Harness models and pricing.

The factory remote start is limited to
• # of starts (usually only 2) • Run time (usually approximately 10 minutes)

Even if the vehicle has a factory remote start, the **DBALL** can be added programmed to **RSR**. This will over ride the factory remote

3 lock start would then remote start and the factory remote start button would become inoperative

SLICE

2-WAY 4-BUTTON REMOTE WITH LED REMOTE STARTER

Compustar has taken another step forward with the release of the Slice.
Slice, also referred to as the RF-2W940-SS, combines performance, power and beauty into a remote casing that has the entire automotive industry abuzz.

Slice can lock your doors and start your car from up to 4000 feet away. But what makes the Slice so special is its ultra-thin body that is less than 1/4" thick. The overall design of Slice is inspired by a growing demand for products that excel in both convenience and design.

Slice can be programmed to most Compustar remote start and security systems. It features 2-way confirmation, giving you instant confirmation of your vehicle's engine and lock status.

DRONE mobile COMPATIBLE

2-WAY 4-BUTTON LED REMOTE WITH REMOTE STARTER

Range up to 4000 Feet

PLUG & PLAY T-HARNESS FOR DBALL

#CHTHD1 - Chrysler CAN style T-Harness
Installing a remote starter in any Chrysler, Dodge or Jeep model equipped with TIP START ignition system has never been easier. CHTHD1 plug in T-Harness can shave time off your install & limit comebacks caused by loose connections.

#CHTHD2 - Chrysler MUX style T-Harness
Easy to use T-Harness allows for plug & play install in any MUX type Chrysler. Plug in the CHTHD2 T harness between the key switch & the factory ignition harness, plug in a DBALL on the short end and you're done.

#TLTH1 - Toyota /Lexus T-harness TL1 for DBALL
Easy to use T-harness allows for plug & play installations in certain model Push-to-Start Toyota/Lexus vehicles. Simply plug in the TLTH1 T-harness at the OBD connector and one wire at the vehicle and you're done.

#TLTH2 - Toyota T-harness TL2 for DBALL
Easy to use T-harness allows for plug & play installations in certain model Push-to-Start Toyota/Lexus vehicles. Simply plug in the TLTH1 T-harness at the OBD connector and one wire at the vehicle and you're done.

#OBDTHDGM1 - GM OBDII T-harness GM DBALL
Easy to use T-Harness allows for plug & play installations in compatible GM vehicles. Simply unscrew the OBDII plug from the vehicle and replace with the female plug of the T-Harness and plug the original OBDII into the male plug of the T-Harness. Plug the T-Harness into the DBALL and you're done.

#OBDTHDGM2 - GM OBDII T-Harness GM DBALL Snap In
Easy to use T-Harness allows for plug & play installations in compatible GM vehicles. Simply unsnap the OBDII plug from the vehicle and replace with the female plug of the T-Harness and plug the original OBDII into the male plug of the T-Harness. Plug the T-Harness into the DBALL and you're done.

PRICE	10+ UNIT PRICE	RETAIL
$15.34	$14.28	$22.89

#THNISS3 - NISSAN/INFINITI for DBALL
Allows you to connect the DB-ALL module in select 2006-up Nissan and Infiniti vehicles.

- Interface harness comes in handy when you're using their DB-ALL databus module to install a security system in certain Nissan and Infiniti vehicles, saving you hours of installation time and wiring hassles
- Allows plug-and-play installation in most instances, but may require additional connections of up to three wires in some vehicles
- Warranty: limited lifetime

PRICE	10+ UNIT PRICE	RETAIL
$40.42	$37.61	$59.99

#THGM610/#TBGM610 - GM6 & GM10 T-Harness
GM regular and blade key, plug and play T-Harness supporting RSR, RXT and Standard installation with a remote starter.

- Dual head design for both GM6 and GM10 FW support
- Built in valet switch for RSR and RXT install types
- High grade (Tier 1) GM connectors for factory like fit
- Supports every installation types (RSR, RXT and Standard install)
